Shock Absorbing System

Made in Australia

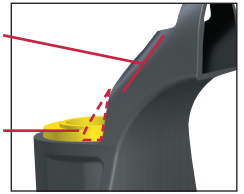

Innovation in action
Improve your performance with comfort

This Rowlock has been designed to fit all models of oars on the market

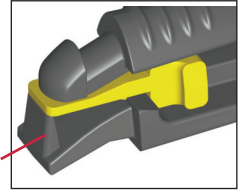

Several major improvements leading to the MK1 Evolution

Material added
Increased strength around clip and security system

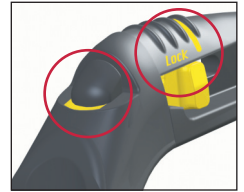

Frame reduction
Provides clearance during rotation on all boats

Yellow Sliding Security System
– Improved action
– Longer and wider
– Better grip

Lock Support (tooth addition)
added for extra security

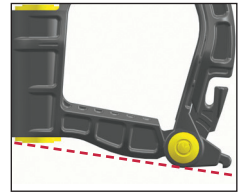

Visual Locking
for 2 visual checking of the rowlock being locked

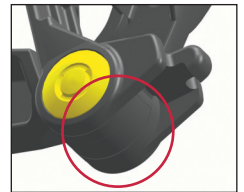

Tension Arm
Inside surface smoother...

and redesigned to provide clearance for the wing rings when tensioned

Internal Stopper
Avoids contact with wing rings

Tension Band
Reduced in size but same tension performance with 3 different tensions for scull and 2 for sweep
